PROFILE

Backend Software Developer with experience in developing RESTful APIs using Node.js, TypeScript, Express, and PostgreSQL. Hands-on experience with business logic implementation, data modeling and persistence, authentication, authorization, and permission control. Applies Software Engineering principles such as Clean Architecture and Clean Code, alongside request validation and application security practices. Currently pursuing Analysis and Systems Development at UCB while deepening expertise in Backend, Cloud Computing (AWS), and Python. Seeking opportunities as a Software Engineer in internship or junior roles.

PROJECTS

Financial API | [Node.js](#), [TypeScript](#), [Express](#), [PostgreSQL](#), [Prisma](#)

- Developed a RESTful API with 9 endpoints for managing users and financial transactions.
- Implemented JWT authentication and secure password hashing using bcrypt.
- Built business rules and data persistence logic with PostgreSQL and Prisma ORM.
- Implemented request sanitization, data validation, and code standardization using TypeScript and ESLint.

Instagram API | [TypeScript](#), [PostgreSQL](#), [Prisma](#), [Node.js](#), [Express](#)

- Developed an API with 6 endpoints for managing user-related features.
- Implemented authentication and authorization to secure private routes.
- Designed Role-Based Access Control (RBAC) for granular permission management.
- Structured the project following Clean Architecture principles to keep it scalable.
- Implemented data modeling and persistence using PostgreSQL and Prisma.

MO Bank - Financial Management System | [React](#), [TypeScript](#), [React Router](#), [Tailwind CSS](#)

- Developed a Single Page Application (SPA) for managing finances, invoices, and bank statements.
- Integrated REST APIs utilizing asynchronous requests.
- Implemented error handling and dynamic data updates.
- Built with Context API and React Router, focusing on code organization and responsiveness.

Landing Page | [React](#), [TypeScript](#), [Tailwind CSS](#)

- Reduced payload size from 16.46 MB to 6.86 MB (58%) through refactoring and optimization of assets and resources.
- Developed a responsive web application using React and TypeScript, focusing on UI/UX and clean code organization.
- Implemented componentization, React Router, and Context API.
- Implemented animations and micro-interactions using GSAP and anime.js.

EDUCATION

Analysis and Systems Development — Universidade Católica de Brasília (UCB) | 2nd Semester | Expected Graduation: June 2028

Languages: Intermediate English | Fluent Portuguese

SKILLS

Backend:	Node.js Express RESTful APIs API Integration
Languages:	TypeScript JavaScript SQL Python
Database:	PostgreSQL Prisma ORM Data Modeling
Security:	JWT bcrypt Authentication Authorization RBAC Validation Sanitization
Software Engineering:	Clean Architecture Clean Code Software Testing
Tools:	Git GitHub Figma
Methodologies:	Scrum Kanban
